WORK EXPERIENCE

Product Executive (Associate Product Manager) - Travelxp, Mumbai, India

Oct 2025 – Present

An OTT & OTA B2C travel platform combining travel content with booking experiences for users worldwide.

- Led development of an AI-powered Flight Quotes feature using Vercel AI SDK, reducing manual effort by 40%.
- Integrated E-Trav supplier APIs to improve booking accuracy and inventory reliability, contributing to a 12% increase in successful bookings.
- Identified baggage visibility gaps causing user drop-offs and implemented structured responses and fallbacks to improve booking reliability, reducing drop-offs by 20% and increasing user trust during checkout.
- Introduced EMI payment functionality through JusPay ExpressCheckout integration, improving payment flexibility and contributing to a 15% increase in international bookings.
- Implemented an automated PDF ticket generation and delivery system across Travelxp, reducing customer support requests for ticket PDFs by 35% and improving the post-booking experience.

Product Consultant (Part-Time) - BitZetta, Remote

Jan 2025 – Oct 2025

- Contributed to product strategy and roadmap planning for an AI-powered EdTech platform, defining personalized learning features based on student pace, preferences, and performance.
- Built customized business management systems for interior and pharmacy businesses, reducing manual effort by 40%, increasing billing speed by 50%, and improving inventory accuracy by 30%.
- Supported product execution by creating user flows, prioritizing features, and resolving product issues in collaboration with engineering teams.

Product Management Intern - WebMobi, Remote, Berlin

Jun 2024 – Dec 2024

webMOBI's Nexalink is an AI-powered professional networking tool for smarter connections & network growth.

- Owned the product roadmap and vision for Nexalink's Digital Business Card, Personal CRM, and Smart Scanner, driving a 30% increase in user engagement through usability improvements and A/B testing.
- Led user research and market analysis for Email Signature and QR Code Generator features by conducting 15+ user interviews, benchmarking competitors, and defining an MVP aligned with business and technical constraints.
- Crafted and executed the go-to-market strategy for Nexalink, expanding market reach by 15% within 3 months through targeted launch and adoption initiatives.

Product Management Working Student - Tenera, Berlin, Germany

Mar 2022 – Dec 2022

B2B SaaS construction tech platform providing Connected Construction Platform (CCP).

- Conducted user interviews and workflow research with contractors and subcontractors to identify pain points in tender and bidding processes, increasing platform adoption by 10%.
- Worked on feature planning, sprint execution, and backlog prioritization to streamline tender management and subcontractor workflows across the platform.
- Led the translation feature initiative, enabling multi-language support for global construction teams and contributing to a 12% increase in feature adoption across new markets.
